

InnovBot, LLC

A Worldwide Turnkey Industrial Solutions Company

Digitize your inspection processes with cost and service downtime reduction

Wind-Rider

We have automated the most challenging industrial inspection processes. Wind Rider offers a high quality wind turbine inspection and data collection service. Combining state of art robotic tools with computer vision algorithms allows us to perform comprehensive analysis of your blades and predict future failures. Please visit our website to view demonstration data of the inspections we have automated.

WIND-RIDER ADVANTAGES

Inspect areas of the blades not accessible to humans

Lower Expense For Wind turbine service providers

Provide exact damage length and location

Profit For Wind farm operators

WIND-RIDER FEATURES

Drawing of our data collection system with dimensions

Damage detection accuracy based on X, Y, Z (plots)

Subsurface inspection accuracy based on X, Y, Z (plots)
